Last Updated Thursday, 27 December 2007

Today's featured artist is Qwan . His real name is Krister Kalin and he hails from Sweden. While not quite as diverse and polished sounding as our first featured artist (Nagz), Qwan is also highly beat-centric and has some really cool stuff posted at amp.dascene.net. Qwan stays close to the chiptune genre while still remaining listenable and providing enough variation to keep the songs interesting. Qwan is all over the board with his songs and you never really know what you're going to get, so you'll want to listen to at least a few songs before deciding whether you like it or not. Download Qwan's modules here. Remember, to listen to these songs, you'll need to install the proper winamp plugins such as the ones available from chipamp.org .
